The enclosed money-saving card
entitles you to receive
Radio-Electronics for the next
18 months at **LESS THAN HALF**

the regular newsstand price,

and at **ALMOST 50% OFF**

the usual subscription price!

Dear Reader:

You are now invited to discover (at astonishingly low money-saving rates) the many unusual advantages you will enjoy by regularly reading RADIO-ELECTRONICS.

If you haven't flipped through a copy recently, here is a great opportunity to see why nearly 160,000 alert electronics men eagerly await each fact-packed issue.

Month-after-month, RADIO-ELECTRONICS is crammed cover-to-cover with useful know-how on TV and radio servicing, test instruments, transistors, audio, hi-fi, stereo, tape recording, CB, industrial electronics, communications, experimental ideas, hobby highlights--and just about every other area of electronics that is of vital interest to you.

Nothing important in electronics is left out or passed over without complete, crystal-clear reports and analysis. You see at-a-glance, what's happening in electronics, get precise schematics for exciting projects, receive buyers' guides, directories, charts and tables that organize and pinpoint characteristics of equipment you want, read special features that illustrate how to use instruments effectively.

So you can see for yourself -- without risk or obligation -- the practical electronics guidance...tested electronics techniques... sound project plans that RADIO-ELECTRONICS offers -- we make the following attractive suggestion:

Send in the enclosed money-saving card right away, and you can have RADIO-ELECTRONICS at this special low rate--18 months for only \$4.75.

Consider this extraordinary value: you save \$6.05 on the price thousands now pay at newsstands (60 cents per copy) -- and you save \$4.25 on the current low subscription price. And almost immediately -- you'll be reading about how to spot color TV circuit faults fast, how to locate short circuited rectifiers in all TV's, how to buy a tape recorder, how to build a road icing indicator for your car, how to get the most out of your vtvm, vom and scope, and hundreds of other ideas, pointers and recommendations.

(over please)

But RADIO-ELECTRONICS is more than a collection of vital electronics articles, features, schematics and reports -- far more! Each monthly issue is a practical working tool designed to help you keep pace with electronics developments...enable you to solve everyday (and unusual) electronics problems...bring you more fun from your electronics hobbies...alert you to new ideas, inventions, discoveries and breakthroughs that affect you, your job, your future.

For example, servicing expert Jack Darr answers your toughest questions personally in his monthly Service Clinic. Famous author/instructor Matthew Mandl shows how to get better color from new TV sets.

And there are practical and stimulating construction projects by authorities such as Donald Lancaster and James Pugh. For example, unusual test instruments that solve problems you run across every day; items that make your automobile perform better, safer; projects that will add to your leisure-time pleasure in hi-fi, experimenting, CB radio, photography and other hobbies.

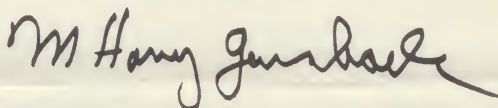

And during the course of the year, RADIO-ELECTRONICS provides special coverage in depth, such key areas of electronics as color TV, hi-fi and tape recording, test instruments and 2-way radio. These thorough up-to-the-minute features themselves are worth much more than your small investment in RADIO-ELECTRONICS' money-saving offer.

So don't delay. This offer is good for a limited time only -- 18 months of RADIO-ELECTRONICS for only \$4.75.

What's more, if you send payment now, we add an extra issue FREE, giving you 19 months in all -- at only 25 cents a copy!

So act now. You've nothing to lose, everything to gain. If RADIO-ELECTRONICS doesn't measure up to expectations, you're completely protected by the air-tight refund-guarantee on the enclosed card. So mail the card today -- before this invitation is withdrawn.

Cordially,

M. Harvey Gernsback
Publisher

P.S. EXTRA BARGAIN: receive 36 issues for only \$9.25 (you save \$12.35 on the newsstand price, or \$5.75 on the regular three-year subscription price). One extra issue FREE (total 37 issues) if payment is enclosed.

If you already subscribe you may take advantage of these special rates to extend or renew your subscription.
